INTRODUCTION

The weekly chart round is a routine activity aimed at reviewing patient care and identifying gaps to ensure optimal treatment outcomes. This report summarizes observations, compliance, and recommendations from the review conducted from **May 01-30, 2017E.C** in the Surgical Ward.

Aim

- To ensure adherence to clinical standards, enhance patient outcomes, and address lapses in care delivery through evidence-based recommendations.

Objectives

1. Evaluate the accuracy of clinical assessments and diagnoses.
2. Ensure rational and evidence-based prescription practices.
3. Assess the appropriateness of investigations and their relevance to patient management.
4. Promote effective treatment plans and continuity of care.

Methodology

- A systematic review of patient charts was conducted.
- Compliance with indicators, such as rational drug use, complete history-taking, and investigation practices, was verified using the provided checklist.
- Observations were recorded as "**Yes**" or "**No**" based on compliance.
- Discrepancies were noted and discussed with attending physicians and nursing staff.

RESULTS

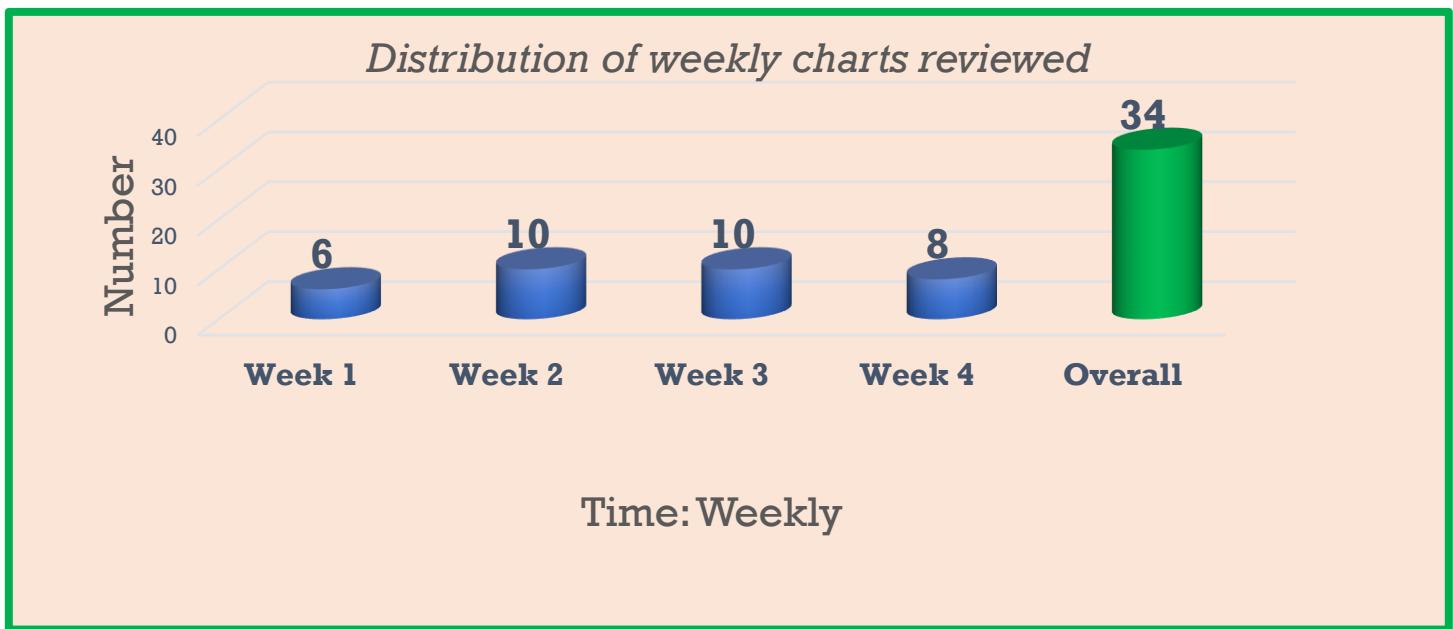

Figure 1: Distribution of weekly charts reviewed, May 2017E.C

The weekly senior chart round results demonstrates a high overall compliance performance of 100% (**Table 1**). All indicators achieved a compliance rate of 100%, including Complete History Taking, Complete Physical Examination, Appropriate Investigations Based on History and Physical Examination Findings, Appropriate Diagnosis Based on History, Physical Examination, and Workup, Appropriate Treatment in Agreement with Standard Treatment Guidelines (STG), and Rational Drug Use (**Table 1**).

Table 1: weekly senior chart round result, May 2017E.C

| Indicator | Compliance (YES) | Non-Compliance (NO) | Percentage Compliance |
|--|---------------------|------------------------|--------------------------|
| 1. Complete History Taking | 34 | 0 | 100 |
| 2. Complete Physical Examination (P/E) | 34 | 0 | 100 |
| 3. Appropriate Investigation Based on Hx & P/E Findings | 34 | 0 | 100 |
| 4. Appropriate Diagnosis Based on Hx, P/E & Workup | 34 | 0 | 100 |
| 5. Appropriate Treatment (Rx) and in Agreement with STG | 34 | 0 | 100 |
| 6. Appropriate Nursing Care Plan (NCP) | 34 | 0 | 100 |
| 7. Rational drug use | 34 | 0 | 100 |
| Overall compliance performance | 238/238 | 0/238 | 100 |

Discussion

The results of the weekly senior chart round highlight a commendable overall compliance of 100%, indicating that the majority of clinical documentation and care processes are being performed in alignment with established standards. This performance reflects the commitment of the healthcare team to ensure quality in patient care. Notably, all key indicators achieved high compliance rates, demonstrating consistency in areas such as history taking, physical examination, appropriate investigations, diagnosis, treatment planning, and rational drug use. These are critical components of quality patient care and signify a strong foundation in clinical documentation and practice.

Recommendations

- NO MAJOR GAP SEEN
